

- x Area of outcrop: large, small
- ↗ ↘ Cleavage: inclined, vertical
- ↗ ↘ Bedding: inclined, vertical
- ↗ ↘ Schistosity: inclined, vertical
- ↗ Younging direction
- ← Structural facing, upward
- Antiform to south
- Antiform to north
- x — Fold axial trace: antifom, synform
- Geological contact, approximate
- Hydroelectrical and telephone lines

- Diabase dyke
- Biotite schist
- Shebandowan-type greywacke, arkose, conglomerate
- Shebandowan-type breccio-conglomerate, pigmented
- Keewatin-type mafic volcanic
